

# Overled Events

First 16bit RGB FULL colour illumination system ,based in Ovelred techology , at the music show ,in combination with NERONE (dmx controller and generator) ART NET node as DMX interface . The full color techology allow more then 16Mil. colour with very hig C R I

Only 10 lamp by 140w each to have fantastic effects and colour mixing ,DMX in and out make installation easier , and graphical display for set up data .

Nerone with light factory for effect show ,have high flexibility ,can manage several ART NET node and expand DMX capability ,also wifi service is available thru art net node , for easy installation and remote control.
