

# Overled Credits

Hotel located in Siracusa (Sicily, Italy), equipped with 240 wall washer, 1,2mt long with Full Colour RGB, each wall washer has 2 DDS309 to drive total 12 RGB led, each board can be addressed with different address, this allows to have more light sections (6+6), the total power consumption of each wall washer is about 60W at maximum light power. Overled supplied optoelectronic technology and DMX driver.

65000 colours are available for each 1,2mt, all wall washers can be used as LED wall displays, just converting data from video to DMX. Several DDS166 DMX buffers are installed for signal buffering, one each 32mt cable, or 32 wall washer units. DDS309 needs 8 DMX channels and in this installation more than 4 DMX universes are used, for wall washer single control.

This installation has been projected by Valerio Maioli SpA with Overled technology
